

Aleksandr Martiushov

📍 Croatia, Rijeka (*ready to relocate*)

☎ +995 59 808 59 12

✉ siberian.may@gmail.com

[LinkedIn](#)

Python developer with 5 years of hands-on experience in backend system design and optimization. Proven track record in building APIs and integrating technologies like PostgreSQL, Kafka, Celery, Redis, and Docker to deliver scalable and efficient applications.

Strong analytical thinker with a passion for problem-solving and a commitment to staying current with the latest technologies and best practices. Actively adopting AI-assisted development workflows (agentic coding, automated code review, etc.) to expedite writing, analyze code, and create comprehensive documentation.

Prior to transitioning into IT, led projects in store design, which has equipped me with strong project management abilities in a tight schedule.

EXPERIENCE

ClickCrewMedia (*August 2024 – Present*)

Developer

- Own the full lifecycle of a multi-service platform (Python/FastAPI backend, React/TypeScript frontend, MySQL, Docker) that consolidates campaign tracking, data visualization, team task orchestration, and cross-platform ad scaling across Voluum, System1, Facebook, Outbrain, NewsBreak, and other traffic sources. Directly contributed to a 4x increase in campaign throughput without additional headcount.
- Architect, develop, and operate a suite of internal APIs and tools for digital advertising — spanning campaign analytics, automated scaling, compliance monitoring, and creative asset management.

DataMaze (*May 2021 – Present*)

Developer, Lead of Data Analysis Team

- Analyze and parse large datasets to extract actionable insights.
- Lead a small team, overseeing project management and ensuring timely delivery.
- Develop backend solutions to automate data processing tasks.

Incymo.ai (*April 2022 – August 2024*)

Web Developer

- Develop a wide range of APIs and tools for AI-powered automation services in marketing and gaming, being solely responsible for numerous micro-services, including payments API integrated with Stripe and various integrations with third-party applications such as Facebook and Figma.
- Conduct code reviews and tests to ensure code quality and consistency across the development team.
- Maintain and enhance the performance of existing codebases, implementing asynchronous operations and optimizing SQL queries for better efficiency.

IDA Project (July 2021 – April 2022)

Web Developer

- Develop the backend side of real estate websites for major companies (e.g., a101.ru, samolet.ru).
- Ensure the scalability and reliability of server-side applications.
- Working closely with frontend developers to integrate backend services.
- Creating a digital ecosystem with site-constructor, catalog, feeds and CRM-integration in a small team of developers. Working with clean architecture and nearly obsessive test coverage.

SKILLS

Programming Languages: Proficient in Python with some full-stack experience with React

Frameworks: Fast-API, Django, Django REST Framework

Development Tools: Docker, Git

Databases: Extensive experience with PostgreSQL, MySQL; familiar with noSQL: Scylla, MongoDB

Other tools: SQLAlchemy, GraphQL, Kafka, Redis, Celery, and cloud services (AWS, GCP)

AI Tools: Experienced in AI-powered development leveraging skills, MCP, and multi-agent orchestration (planning, TDD workflow, review).

Skills: Strong foundation in OOP principles, git-flow, software testing, and algorithm optimization. Experience in reviewing and managing a (4-person) team of programmers.

Languages: native Russian, advanced English, beginner Croatian

EDUCATION

Master's degree of Architecture

Irkutsk National Research Technical University, 2006 – 2012

ADDITIONAL EDUCATION

Python for Specialization

University of Michigan (Coursera), 2020

Web Application Technologies and Django Specialization

University of Michigan (Coursera), 2020

Yandex Algorithms School, 2021

Mathematics for Machine Learning

Imperial College London (Coursera), 2021

AI Fluency Framework & Foundations

Anthropic Academy, 2025

Claude Code in Action

Anthropic Academy, 2026
